

This architectural section drawing illustrates the internal structure of the National Stadium in Singapore. The drawing shows a long, rectangular building with a series of large, curved, rib-like structures that form the roof and support the seating bowl. The seating bowl is filled with spectators, and the drawing shows the internal structure of the stadium, including the seating tiers and the roof structure. The drawing is a black and white line drawing, and it includes a scale bar at the bottom left.

The diagram is a circular urban planning model divided into four main sectors, each with a different land use pattern. The sectors are defined by radial lines and concentric circles representing population density and land use zones.

- Top Sector (Residential):** Features a large, irregular brown shape representing a residential area. It contains several small clusters of buildings and a central green space. The radial lines are labeled with values like 19.24°, 19.79°, 13.12°, 12.19°, 25.76°, 25.81°, 19.18°, 19.24°, 25.72°, 25.8°, 19.24°, 25.72°, 25.8°, 19.24°, 25.72°, 25.8°.
- Right Sector (Commercial):** Features a large, irregular brown shape representing a commercial area. It contains several small clusters of buildings and a central green space. The radial lines are labeled with values like 22.31°, 22.53°, 22.5°, 21.81°, 22.44°, 22.53°, 22.55°, 22.53°, 22.55°, 22.53°, 22.55°, 22.53°.
- Bottom Sector (Industrial):** Features a large, irregular brown shape representing an industrial area. It contains several small clusters of buildings and a central green space. The radial lines are labeled with values like 22.44°, 22.66°, 33.29°, 22.66°, 22.44°, 22.66°, 33.29°, 22.66°, 22.44°, 22.66°, 33.29°, 22.66°.
- Left Sector (Agricultural):** Features a large, irregular brown shape representing an agricultural area. It contains several small clusters of buildings and a central green space. The radial lines are labeled with values like 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°, 22.5°.

The diagram also includes concentric circles representing population density, with values ranging from 5,000 to 11,800. The background is a photograph of a city skyline, and the diagram is overlaid with a grid of radial lines and concentric circles.
